

# Anthurium

## Care & Handling

1. Use clean water for post-harvest without preservatives or floral foods.
2. Keep in temperatures of 15°C (59°F) and 25°C (77°F) to avoid damage to blooms.
3. Extreme care while unpacking is important to avoid creasing or bruising.
4. High humidity or regular misting is important for optimal storage.
5. Blooms should be kept away from direct sunlight and heat sources. They will last longer at cooler room temperature but will suffer from cool drafts.

Storage: 15-25°C (59-77°F)  
Keep out of cooler  
80-90% humidity
