

Snapdragons

Care & Handling

1. Cut stems on an angle and remove any foliage below the water level.
2. Place in clean container with room temperature water.
3. Remember that snapdragons are geotropic (affected by the force of gravity) when arranging!
4. For optimum vase life, ensure that the water is treated with specially formulated flower food (Chrysal RVB).
5. Display in a cool location away from heat sources, air conditioners, direct sunlight, and fruit.
6. Repeat steps 1-2 every 3 days.

Storage: 4-5°C (39-41°F) cooler
75-85% humidity
