Oriental Lilies

Care & Handling

- 1. Cut stems on an angle and remove any foliage below the water level.
- 2. Place in a clean container with cool water.
- 3. For optimum vase life, ensure that the water is treated with specially formulated floral preservative.
- 4. Display in a cool location away from heat sources, air conditioners, direct sunlight, and fruit.
- 5. As the buds open, you may wish to remove the pollen as it may stain.
- 6. Repeat steps 1-2 every 2-3 days.

Storage: 2-5°C (35-41°F) cooler 80% humidity
