

LA Lilies

Care & Handling

1. Cut stems on an angle and remove any foliage below the water level.
2. Place in a clean container with cool water.
3. For optimum vase life, ensure that the water is treated with specially formulated floral preservative.
4. Display in a cool location away from heat sources, air conditioners, direct sunlight, and fruit.
5. As the buds open, you may wish to remove the pollen as it may stain.
6. Repeat steps 1-2 every 2-3 days.

Storage: 2-5°C (35-41°F) cooler
80% humidity
